Customer Reviews

I purchased this book to help me prepare for my COA exam. It was broken down into the chapters that JCAHPO has on the exam, the heaviest weighted chapters having the most test questions. I feel that by using this book along with the 9th edition of The Ophthalmic Assistant: A Text for Allied and Associated Ophthalmic Personnel helped me pass the COA on the first try. This manual phrased the questions almost identically to the questions on the actual exam, and even better, has an

answer guide at the end of each chapter explaining why the answer is correct. You can't go wrong buying this book when preparing for the exam.

Some of the questions found in the book touched on topics that I did not see in my textbook and I find myself researching them and continually learning things I should have known. Any student would be amiss not to purchase this book if they need to do their certification soon. I personally feel that this book is worth every penny that I paid for it and more. This is a must-have study guide and I will give another review of this book as soon as I get my certification.

I used this book as practice tests for my COA and I feel that it really prepared me for the real thing! I passed on my 1st try :)

I am still studying this guide in preparation for the COA exam. I was surprised how thorough and in detail it is. I find it especially helpful to have the reason the answers are either incorrect or correct, instead of just the correct answer. This will help me to be especially mindful of the way questions are worded on the exam. I definitely recommend it for anyone who is going to take the COA exam. Will have to get back to you after I take it to see if it really paid off in the end :D

Thanks to this book, I passed the COA! Great studying material in this book. Quite a few questions I came across were actually on the test!

Great study tool. I found this book to be similar to the actual test in that some questions were easy and some were harder. I passed my COA so I'm pretty happy with my purchase.

I have to say I came into the ophthalmology industry with no experience, worked for over a year and with another book alone and some notecards I tried passing my COA. Did not pass that the first time around. But then I studied this book and used it as base knowledge and it helped make other given materials CLEAR. I just passed today and am quite impressed with how much this helped me get there

Awesome book to help you study for your COA. I love how when it gives you the correct answer at the end of each chapter it explains why it is the correct answer.
