Customer Reviews

This was a great review for histo. The text is easy to understand and the questions after each section, as well in the back of the book, are very helpful. I got through it in one and a half days and felt like I had a good grasp on its content. The only problem was that the standardized microbiology/histo test we took contained much information not found in this book.

Got the CORRECT book. Got a NEW looking book. It's a 9/10 on newness which is good enough for me. The cover is a bit bent but the inside is not highlighted or written in or anything like that. I'm happy with it. Great book. Teaches you what you need to know for a good prep into Path. Got it fast

and prompt.THANK YOU!Happy Holidays.

Nice for a quick and dirty review. The Gartner and Hiatt text is a very exhaustive reference, but this BRS text is a very light and easy read. Important structures and terms are bolded. Questions at the ends of each chapter are simple, but cover the topic well. Do not use this as a resource for practicing boards questions, but rather to review the material and as a quick reference guide.

Its a decent book for reviewing histology. I ended up using it less than I thought in my medical school classes but I still pull it off the shelf when a topic is being covered with a lot of histology slides.

Good content outline. First review book I've bought. Very detailed so may not be great for board studies but it is helpful for my first time histology course.

It's short and to the point...I would suggest IMG candidates to go through this especially candidates like me who have completed their Medical College way back...a perfect refresher.

nice overview of the subject. the practice questions at the end are beneficial. I would recommend this product to other medical students.

Good book in outline form that covers the basics in a clear concise way. I recommend it for board study and class outline
