Maternity Nursing: An Introductory Text, 11th Edition

Synopsis

From prenatal through postpartum care, Gloria Leifer's *Maternity Nursing: An Introductory Text* provides an essential foundation for promoting the health and wellness of mothers and newborns. This edition includes the latest advances and practice standards in maternity nursing care, highlighting Healthy People 2020 and the 2011 Joint Commission National Patient Safety Goals. Part of the popular LPN Threads series, this text addresses the knowledge, skills, and scope of practice appropriate for LPN/LVN and LPN/LVN-to-ADN ladder programs. Chronological organization of content follows a sequence from family issues, fetal development, pregnancy, labor, birth, and care of the newborn, to postpartum issues with special social, familial, and cultural considerations. Organization of concepts in each chapter by simple to complex and from health to illness makes it easier to locate and understand the material. Complete, concise coverage includes a table of physiologic and psychosocial changes throughout the pregnancy, unique content on CPR for the pregnant patient and infectious diseases acquired during pregnancy, a pictorial story of a vaginal birth, cultural considerations of pregnancy and maternal care, and nursing responses to loss, death, and grief. **UNIQUE!** A FREE Study Guide in the back of the book reinforces understanding with multiple-choice, fill-in-the-blank, scenario-based clinical situation questions, and online activities. Nursing Care Plans with critical thinking questions help in understanding how a care plan is developed, how to evaluate care of a patient, and how to apply your knowledge to clinical scenarios. Health Promotion boxes and content focus on family-centered care, health promotion, illness prevention, and women's health issues. Clinical Pathways use an interdisciplinary, collaborative-care approach in tracking interventions along a timeline from assessment to discharge and follow up. Online resources for further research and study are included at the end of each chapter. **UNIQUE!** LPN Threads make learning easier, featuring a 10th-grade reading level, key terms with phonetic pronunciations and text page references, chapter objectives, special features boxes, and full-color art, photographs, and design. Coverage of the latest advances in nursing care includes fetal heart rate monitoring during labor and delivery and revised diabetes classifications. **Get Ready for the NCLEX® Examination!** section at the end of each chapter includes key points, review questions, and critical thinking questions for individual, small group, or classroom review. **Safety Alert!** boxes highlight 2011 Joint Commission National Patient Safety Goals, with special consideration for serious and potentially fatal medication errors. Easily recognizable icons for standard steps are included in each skill (e.g., hand hygiene). **UNIQUE!** Icons in page margins point to relevant animations and video clips on the companion Evolve website.

Customer Reviews

I was very suprised by the size of this book. It is a fairly small book (think workbook size).It includes a study guide in the back of the book, but the answers are not included. (Ask your teacher, they should have them with the teacher's edition of the book).Although small, this book is very indepth. The chapters start out with a quick overview of reproductive anatomy, and how different cultures deal with pregnancy. The book then goes into detail about the fetal growth and stages, changes in the mom and baby throughout these stages, labor and delivery, newborn care, postpartum care, and reproductive issues. The book includes many pictures for those of us that are visual learners! This book is a great reference for any maternity care. It is very in depth and goes above and beyond pregnancy and labor. The book is very easy to understand and I didn't have a hard time getting bored with reading the chapters.I hope I helped a little about what to expect out of the book.If you need this for a nursing class then good luck, you will make it to graduation!!

This is a good book and required for my LPN school in Brentwood. If you need it contact me. I have many books that can be bought on the cheap. I will be posting a flyer at the school as soon as winter break is over.I went to ES BOCES LPN and needed this book. T X T 6 3 1 7 4 0 4 7 4 7 and I will sel I you mine for cheaper.

My school is selling this book for over \$50 so i was happy to get it for this price :)

Great text for Maternity! Very useful information presented in a readable format.

Great!!! Item arrived as expected. Nice to do business with

It was a great book and in excellent condition
