I love the Airbender animation series. I can still remember the strong nostalgia I had while watching the first episode of The Legend of Korra: Book 1 Air, recalling all the characters from the previous series, and watch how time has passed and given us a new generation to look upon. The Legend of Korra: Book 1 - Air, The Art of the Animated Series is a nice addition to that experience. It's as good as the first art book Avatar: The Last Airbender: The Art of the Animated Series. The cover art is different from the original product image. It has Korra looking rather too serious. The book features development art from all the 12 episodes in Book One: Air. There are designs for the main characters, followed by the Republic City and its inhabitants and then we have art from each episode in order. Character designs form the bulk of the book. There's Korra in different outfits, including those from Pro-bending gear, and also the cute four-year-old Korra. There are lots of line art and also coloured versions for the characters. Other characters are Tenzin and his family, Lin

Beifong, Amon, Katara, and about most of the characters that appear in the episodes. The environment art are beautiful. The buildings and sets have a mix of oriental, industrial and European style. The world has changed since Aang was the Avatar. You'll see some connection to the past, for example, with Avatar Aang Memorial Island. Overall, the world feels very different because it has evolved. My favourite piece is the aerial painting of Air Temple Island that appears towards the end.
